ART UNIT 3621
MAR 23 2006

The following is an Examiner's Statement of Reasons for Allowance

With respect to independent claim 34, the prior art of record fails to anticipate or render obvious the claimed combination of a method for extracting a watermark from data containing a watermark including: receiving data containing a watermark including plural-bit message and at least one steganographic component; with reference to the steganographic component, determining a registration associated with the data or component; and extracting the plural-bit message of the watermark with at least consideration of the registration in the manner and complexity explicitly recited in the claims of the invention. With respect to independent claim 39, the prior art of record fails to anticipate or render obvious the claimed combination of a method for extracting a watermark from compressed data containing a watermark including: receiving compressed data containing a watermark in the form of n by n blocks, which has been subjected to distortion; transforming the data; determining a calibration of the transformed data based on the characteristics of a steganographic calibration component associated with the watermark; and extracting the watermark from the transformed data based at least in part on the calibration in the manner and complexity explicitly recited in the claims of the invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and to avoid processing delays should preferably accompany the Issue Fee. Such submissions should be clearly labeled Comments on Statement of Reasons for Allowance.
